The Niagara Dental Hygienists’ Society, Ivoclar Vivadent and Cetylite are honoured to present:

The Future is Now - Let’s Talk Lasers

Course Description: There has never been a better opportunity than now in treating your patients through the incorporation or Laser technology. Join in as we look at the key elements associated with the successful integration of laser through the eyes of the Dentist, Hygienist and Team. Explore the value and benefit of laser assisted periodontal therapy as you travel this path of discovery that will take you to new levels in patient health and wellness. On this program we will discuss how lasers maximize clinical outcomes, and talk about the healing effect of the diode laser at the biologic and molecular level of repair and regeneration. You will learn how laser-assisted bacterial reduction meets the demands in treating both biofilm infection and the host immuno-inflammatory side of the periodontal infections through the absorption of light energy. Take a scientific journey that will shift your clinical skills to another level of dependable, predictable treatment, and healing through a technologically advanced model patient care.

Program Learning Objectives:

- Understand the science of laser wavelengths and their absorption characteristics
- Discuss the key elements of laser safety
- Explain how the diode element functions and produces the unique characteristics of laser energy
- Identify how diode laser energy interacts at all levels of the periodontal infections
- Discuss the healing effect of the diode laser through disinfection and bio-stimulation
- Make clinical decisions and apply laser protocols that increase productivity through increased patient treatment acceptance
- Expand your practice laser surgical procedures through team communication that supports patient enrollment.

Janet A. Press RDH

Janet Press, RDH, Fellow of the Academy of Laser Dentistry, in specialty and general practice for 35 years with 15 years clinical experience on soft tissue lasers. Ms. Press holds Standard Proficiency in both Diode and Nd:YAG lasers and has served on the ALD Regulatory Affairs, Scientific Sessions, and Auxiliary Committees. Previously co-director of Dynamic Team and Laser Certification Programs at Las Vegas Institute for Advanced Studies (LVI), Janet speaks internationally and holds the honour of being named a “Distinguished Dental Professional”.

Through her powerful, positive programs, Janet inspires participants to achieve extraordinary results, relationships and profitability in their professional practice, by incorporating cutting edge laser technology with skilful team and patient communications

A portion of the proceeds will be given to: St. Catharines General Hospital Fund
